The classic combination is a black design on a natural coir background, but we can create your design from any combination of the colours above for the background and logo.

The design will last for the lifetime of the mat.

- Our synthetic coir is made from 100% polypropylene. The colour runs throughout the pile for long-lasting wear.
- Pantone matching is not available on synthetic coir, but we do offer exact colour matching on other products, so call us with your requirements.
