

# SYNTHETIC COIR SCRAPER CARE & MAINTENANCE GUIDE

EVERYTHING YOU NEED TO KNOW

## SYNTHETIC COIR SCRAPER INDOORS & OUTDOORS

Our synthetic coir scraper mats are made from a very durable UV resistant blend of nylon fibres, and can be situated both indoors and outdoors. The tough nylon fibres mean that when placed outdoors, the mat will withstand all weathers and will not be adversely affected by rainfall. If rain water does collect on the mat, you may want to lift it up to allow the water to run off.

any queries

## CLEANING INSTRUCTIONS:

- Launder the mat on its own using the shortest possible 40°C washing machine cycle
- Tumble Dry at a maximum of 80°C for no longer than 10 minutes
- Remove the mat immediately from the Dryer and lay flat. Allow the mat to cool before rolling
- If the mat has been situated outdoors, you may prefer to hose the mat in situ using a mild detergent and rinsing with clean water.
- Do not fold the mat to store it, as this can cause the backing to crease and crack.

## FEATURES

- MACHINE WASHABLE
- LOW PROFILE
- WITH BORDERS FOR LOOSE LAYING
- WITHOUT BORDERS FOR MAT WELLS
- 72 COLOURS
- INDOOR & OUTDOOR USE
- CUSTOM SIZES
- PERSONALISED
