

MADE TO MEASURE CARPET / TEXTILE MATS FITTING GUIDE

EVERYTHING YOU NEED TO KNOW

CARPET / TEXTILE MATS WITHOUT BORDERS

Our washable carpet mats are easy to trim in situ. All mats without borders are produced slightly oversize to make trimming straightforward and to ensure a good fit into your mat well. Simply trim off the excess by following our useful guide. You will need a sharp "Stanley" type craft knife, a straight edge to cut against and a piece of white chalk.

FITTING PROCESS:

- Firstly lay the mat face up in the mat well (rubber backing side down).
- Now lift up the edges one by one and run the chalk along the edge or rim of the mat-well coating it with the chalk.
- Let the mat drop onto the chalked edges to mark the rubber backing.
- Take the mat out of the well, turn it over and using the knife and straight edge cut about 2mm inside the chalk mark on all 4 sides, you really only need to score the backing and tear the waste piece off.
- The mat should drop straight back in to the well. Extra trimming in places may be required for a snug fit.
